

VMS is a solution that tailored for convenience of Visitor Management by using MyKad. MyKad is compulsory for all Malaysian to carry because it is your citizen identification. Therefore, the information is accurate and no cheating is allowed.

Smarter & Speed Up Visitor Registration Process

With the integration with Smart Card Reader Keyboard, the check-in process for visitor becomes easier and faster. Information will be read and store into VMS immediately once MyKad slot in to the reader.

Enhance Security over Visitor attendance

With VMS you can monitor different categories of visitors such as vendors, contractors, authorized visitors and unauthorized visitors. VMS also allows visitor to be blacklisted due to their irresponsible visit and VMS will alert the guard when the person register for second visit in future.

Friendly User and Easy to use

It was specially designed to be operated with almost no training required to anyone who experienced or without experience over visitor management.
